SUMMARY

A UX/UI Designer with over 6 years of experience designing enterprise products and large-scale corporate websites. Skilled in translating business requirements into effective UI solutions and proposing design strategies backed by user research and competitive analysis. Experienced in conducting the end-to-end design process, from conceptual design and design systems to wireframes and prototypes. Leveraging AI-assisted design methods to accelerate wireframing and optimize design review processes. Experienced in delivering design-to-code handovers, enabling developers to directly transform UI designs into implementation-ready code while collaborating closely with cross-functional product teams to deliver high-quality digital products.

SKILLS

SPECIALTIES

- User Research and UX/UI Design
- Information Architecture
- Vibe Design & Vibe Coding
- Basic HTML, CSS and Wordpress
- Agile Progress
- Design tools
 - Figma, Figjam
 - Adobe Photoshop, Illustration

LANGUAGE

- English : Intermediate
 - TOEIC 625
- Thail : Native

WORK EXPERIENCE

2022 - Now **UX/UI DESIGNER** | InsightEra Co., Ltd. (Gable Subsidiary)

- Gathered business requirements and translated them into user-centered design solutions
- Conducted user research and competitive analysis to inform design decisions
- Conducted the end-to-end design process from wireframes to final UI design
- Created and refined UI/interaction-focused user stories
- Built and maintained the design system for consistency and scalability
- Delivered UI handoff to developers and reviewed implementation for design accuracy
- Managed design resources and collaborated closely with the product team to ensure timely delivery

GENA - Enterprise AI platform Project (Main UX/UI Designer)

Product Design from Scratch - Designed a product from scratch (Day 0), independently driving the end-to-end design process while planning and managing design execution in alignment with the product roadmap and timeline.

AI-Driven Design Workflow - Conducted AI-related research to define product direction and propose new features. Utilized AI tools to generate high-fidelity wireframes for business validation, reducing design time from 3 man-days to 1 man-day. Designed UI interfaces and delivered structured handovers to developers through backlog grooming. Implemented a design-to-code workflow to enable developers to transform UI designs into implementation-ready code. Reviewed implemented UI using AI-assisted tools to validate design accuracy and consistency, reducing design review time by 30%.

User Story & Acceptance Criteria - Updated user stories and acceptance criteria (A/C) with detailed UI behavior and interaction flows, ensuring clear alignment between product requirements, design intent, and development implementation.

Design System & Branding - Built and maintained a centralized design system to ensure scalable and consistent UI patterns across the platform, and designed the GENA product logo.

ALICE - Social Management Tool (Main UX/UI Designer)

Revamped the product design, transforming a highly technical platform into a more intuitive and user-friendly experience, significantly improving usability and overall user experience.

Created and established the design system to ensure scalable, consistent UI patterns across the product.

CENT - Social Management Tool (Associate UX/UI Designer)

Designed the new features of existing product. Conducted the research, Ideated and proposed design solution. Created UI aligned with design system of product.

WEBSITE IMPLEMENTATION PROJECTS

Designed digital products across websites, web applications, and mobile platforms for domains including Energy & Petrochemical Enterprise, Industrial Solutions, Technology & Cybersecurity, and AI platforms, delivering solutions tailored to diverse business needs and user contexts.

Transformed business requirements into scalable UX/UI solutions, covering wireframes, UI design, and developer handoff.

Managed design resources and project priorities to ensure on-time delivery aligned with project timelines and stakeholder expectations.

PRE-SALE SUPPORT

Supported pre-sales activities by proposing solution concepts and UX/UI approaches, including sitemap creation, user journey mapping, design directions, mockups, and clickable prototypes to support stakeholder alignment and client decision-making.

2019 - 2021

JUNIOR UX/UI DESIGNER | Goconnext Co., Ltd.

- Participated in meetings with clients and stakeholders to gather requirements, understand business objectives, user needs, and define project scope.
- Translated user requirements into clear, user-friendly, and responsive website designs.
- Developed and implemented websites using WordPress, managing the process from design to deployment.
- Managed the end-to-end workflow, from client communication and wireframing to documentation and final website handover.

E D U C A T I O N

2014 - 2018

KING MONGKUT'S UNIVERSITY OF TECHNOLOGY THONBURI

Bachelor of computer engineering
